Subject: No Electric Scooters or E-bikes

-EXTERNAL-

To Whom it may concern,

This will be a brief and to the point email regarding Electric bikes, and Electric scooters on the bike path. We already have unsafe conditions with E-bikes and E-scooters around the city not abiding by the laws and rules. Electric scooters and Electric bikes already ride against traffic, on sidewalks and the wrong way on bike paths. Enforcement of laws by police is impractical, fiscally unreasonable, and most go unaddressed. The consequences of only a ticket is not enough of a deterrent even if it could be enforced. E-bikes ride at unsafe speeds and maneuver unsafely around other slower means of transportations. The city wants to allow electric transportation but can't enforce the problem's they already have.

Thanks
